Conclusion

Nightlife

City of Kranj

In 96% of the attempts in supermarkets underage are sold alcohol in Kranj.

- Community mobilisation
- Training (RBS)
- Enforcement

Test purchases: no or very small (0-0.3%) changes in refusal of alcohol to underage or pseudo-intoxicated patrons in venues that received full, partial or no intervention (no graphic available).

The first two intervention components were successfully implemented but the enforcement did not work out as planned (withdrawal of the police).
